Professional Summary:

Software Engineer with strong experience in backend development using Java and Spring Boot. I am skilled in designing scalable solutions, building robust APIs and distributed systems, managing databases and microservices, and applying software engineering best practices. Proven ability to learn quickly, adapt to new tools, and troubleshooting complex problems. Experienced in database management, agile environment, workflow optimization and full-stack development with frontend framework React, Spring Boot and MySQL.

Work Experience

Full-Stack Developer (Graduation Project) | Gerson Andre S.A. | San Jose, Costa Rica | July 2025 – Present

- Engineering a full-stack enterprise application using React, Spring Boot, and MySQL, applying modular architecture and clean code principles.
- Designing a service-oriented backend with layered cost-effective architecture (Controller → Service → Repository), leveraging Spring Boot modules such as Spring Web, Spring Data JPA, and Spring Security.
- Implementing RESTful APIs following industry standards (pagination, DTO mapping, request validation, global exception handling) with clean and maintainable code.
- Building a reactive and component-driven frontend with React, using Hooks, Context API for state management, and reusable UI components.
- Modeling relational data structures and optimizing database queries with JPA, Hibernate ORM, and indexing strategies.
- Implementing authentication and role-based authorization with JWT, password hashing, and secure session management.
- Integrating automated testing suites using JUnit 5, Mockito, and React Testing Library, improving reliability and reducing regressions.
- Utilizing Git-based workflows, including feature branching, pull request reviews, and semantic commit conventions.

- Documenting API endpoints and system architecture using OpenAPI/Swagger and UML-based diagrams (use cases, sequence diagrams, and class diagrams).

Back Office Agent | UCB | Heredia, Costa Rica | March 2021 – Present

- Coordinated and tracked patient referrals with insurance providers, ensuring accurate data entry and timely documentation.
- Managed internal systems to maintain databases, monitor referral statuses, and support operational efficiency.
- Worked with cross-functional teams to enhance workflows and customer support processes.
- Maintained high attention to detail when handling sensitive information, supporting compliance and data integrity.
- Assisted in generating reports and analyzing key performance metrics to improve service quality.
- Demonstrated strong adaptability by quickly learning new digital tools and platforms to enhance daily operations.

Education:

Bachelor's degree in computer science

Universidad Internacional de las Américas | November 2026

Certifications:

SCRUM Practitioner Certification | CertiProf

Conversational English Certification | INA

Skills:

- Java
- Spring and Spring Boot
- Design patterns
- JavaScript and TypeScript
- AWS
- Python
- C#
- SQL databases
- React
- Git

- Postman
- VS code

Soft Skills

- Problem-solving
- Analytic thinking
- Adaptability
- Quick learning
- Ownership
- Professional Development
- Continuous learning

Languages:

- Spanish – C2
- English – B2
